

SPECIFICATION:

Depressible Permanent P3B PRP1 Road Stud using a Microprismatic lens

RELEVANT STANDARDS:

BS EN 1463-1:1998

BS EN 1463-2:2000

REFERENCED STATUTORY INSTRUMENT

Traffic Signs Regulations & General Directions 2002

To specify the above product the following description can be used:

A road stud rated P3B PRP1 in accordance with BS EN 1463-1:1998 which meets the requirements of direction 57 of the Traffic Signs Regulations & General Directions:2002.

3M™ Stud Series 590 Depressible Reflecting Road Stud

3M™ Stud Series 590 Depressible Reflecting Road Stud meets the description stated above. In addition the stud has a reflector made using microprismatic retroreflective material with a self-healing coating.

The following is the complete set of ratings and codes as published in the BSI Declaration of Test Results dated 9 December 2005.

P3B, H3, HD1, NCR1, PRP1, S1, R2

P	permanent
3	plastic reflector with abrasion resistant layer
B	depressible
H3*	height
HD1*	horizontal dimension
PRP1*	reflective performance, new
NCR1*	colour of reflected light
S1*	retention of studs at end of road trial
R2*	retention of reflectivity after road trial

* meets the requirement for this characteristic in TSR&GD:2002 direction 57
